Good evening, Prasanna. Three things need you before tomorrow.

Critical ticket

WT-5 · MuleSoft production server disconnected

Open since today and assigned to you. Last similar outage was fixed by restarting the worker and rotating the VPN session.

Decision

SIA will finish 47 days late — move to 19 Dec?

3 tasks were added in two weeks and 2 are overdue. At the current pace the new date is 19 Dec. I can update the plan and message the 3 people involved.

This project slipped because **2 of 3 tasks are overdue** and both wait on the LMS team. Forecast: **2 Nov → 19 Dec**.

I can do this for you

- Move due date to 19 Dec and tell the team — Run
- Ask LMS team for the field mapping (draft mail) — Run
- Write the weekly status for Monday — Run

Every action asks before it changes dates or messages people. Logged in Activity.
